

ESTA Patent Statement

ESTA intends not to publish any standard that contains protected intellectual property, unless that information can be licensed by anyone for a reasonable fee. ESTA uses a process of open patent and copyright disclosures to implement its intent. ESTA does not conduct patent or copyright searches and does not warrant that its standards contain no protected intellectual property.

In keeping with the open disclosures policy, at every working group meeting a request is put out for anyone to notify the working group of the existence of a patent, patent application, copyright, or other protected intellectual property that might protect material in a standard being developed by this working group.

The Patent Policy established by the American National Standards Institute (ANSI) requires that a record of the patent holder's statement be made publicly available by ESTA. The following pages are the statements ESTA has on file from patent holders in response to the call for patents. ESTA makes no judgment as to the validity of the referenced patents or to their relevance to any particular ESTA standard or any product developed using a standard.

Patent Pending Disclosure

Karl,

At LDI 2013, I exhibited within the James Thomas booth my patent pending invention:

“Power Lock System for Stage Truss Towers”

I have continued to prosecute my patent and one or more claims have been allowed by the USPTO.

The patent should be issued before we meet again. The invention and my specific embodiments are now available for license to all parties on a non-discriminatory basis at a reasonable cost.

This patent specifically addresses:

ANSI E1.21-2013

Entertainment Technology —

Temporary Structures Used for Technical Production of Outdoor Entertainment Events

Regards,

Bruce Darden
